The G-scale refers to a scale of 1:22.5, which means that one inch of distance on the model is equivalent to nearly 2 feet on a full-sized train. For comparison, the most common type of scale for train kits is the HO-scale, which has a ratio of 1:87. That means a G-scale train will be approximately four times larger than an HO-scale one.

This opens up the opportunity to include significantly
