Our forced air wood furnaces have produce enormous amounts of heat safely outdoors. All units are extremely weather proof and built to last. For more information and model specifications, click here.

[Welcome | AirStove Outdoor Furnace](#)

A forced air outdoor furnace is different from a boiler or water wood stove, because it does not heat water or require chemicals to operate. AirStoves provide heat to your home by radiating the heat from the fire through steel (like your Dads old wood burner without the water pot) and trapping it inside a sealed chamber which then is.
