Shouldice Hospital uses natural tissue repair whenever possible, or in over 98% of all its hernia cases. Natural tissue repairs can safely be done using local and conscious IV sedation which avoids the complications of general anaesthesia.

[Surgical management of mesh-related complications after ...](#)

The use of synthetic mesh in procedures such as groin hernia surgery, abdominal sacrocolpopexy, and suburethral slings has been proven to be effective and is well established [5-7]. However, current data suggest that the use of mesh in vaginal prolapse surgery is associated with both benefits and risks. Few randomized controlled trials have been published. They reveal improved anatomic outcomes and lower recurrence rates, but similar subjective outcomes and substantial mesh-related
